What We Heard

A few key themes from the **140**  comments...

“One of the most important things to me, which does seem to also be stressed in the Transit Oriented Development section, is using this project to make Rivers Ave more accessible to walkers and bikers. Improving that road through the project would do wonders for the community.” – Alyssa

“As an MUSC employee, it is critical to the alleviation of congestion on our roadways as well as the strain on limited parking in our medical district.” – Anne

“So excited to see this coming! I won't drive on the interstate or drive downtown Charleston, so this will be great & I can go to Charleston whenever I want.” – Angela

Topics Important to the Community:

- | | |
|----------------------|--|
| Roadway Design | Bicycle & Pedestrian Features |
| Airport Connectivity | Enhanced CARTA Routes |
| Service Frequency | Park & Ride Locations |
| Flooding & Parking | Connections in Goose Creek & West Ashley |

LC | **Lowcountry**
RT | **Rapid Transit**
