With 30% Design Plans Complete, LCRT is Still in Early Development

## Constantly Progressing

The Lowcountry Rapid Transit Project is still in early development. The project team has completed 30% design plans. It is important to understand that the design will change as the project progresses with more detailed engineering. The project improvements are intended to stay primarily within the existing right-of-way and minimize impacts to adjacent properties.

However, in some places, additional right-of-way may be needed to accommodate features such as sidewalks or multi-use paths. The public will continue to have regular opportunities to engage with the project team as the project advances.

We are continuing to work closely with our partners. We expect a decision on moving to the next phase this spring.

If your constituents have questions about right-of-way or the proposed design for LCRT, please have them contact [Morgan Grimes, BCDCOG Outreach and Communications Specialist](#), at 843-729-1413 or [morgang@bcdcog.com](mailto:morgang@bcdcog.com).

## TOD Report Published

The final TOD Report for LCRT was published in February and is available for public review on [www.lowcountryrapidtransit.com](http://www.lowcountryrapidtransit.com). The report can be easily accessed by visiting the TOD page titled [Livable Communities](#) or the [Resources](#) page.

## Meetings & Community Events

**We remain committed to active and ongoing engagement in the community:**

Our outreach team visited 11 locations in February to meet with communities and business along the corridor, including:
